SKILLS AND TOOLS

TypeScript · React · Next.js · React Native · Redux · MobX · TailwindCSS · Sass · GSAP · Three.js · HTML5 · CSS3 · Python · Node.js · Java · PHP · Laravel · Wordpress · Sanity · PostgreSQL · MySQL · MongoDB · Firebase · Docker · Photoshop · 3Ds Max · Blender · Figma · Canva · GitHub · npm · CursorAI · Claude

HOBBIES

bass guitar · automotive · music · traveling · technology · pottery

ABOUT

Creative fullstack developer with hands-on experience in web and mobile applications, internal systems, and 3D. Well-versed in the medical industry - from organizing national and international congresses and conferences to dedicated software: document processing pipelines, mobile apps, VOD, virtual booths, improvements and updates to existing systems, on-site and on-the-road IT support. Built an NFT auction system and dApp tied to a 3D MOBA game on Unity. From VanillaJS through frontend and backend frameworks, relational and non-relational databases to Docker - comfortable across the full stack, integrating AI/LLM models. Particularly drawn to creative frontend and WebGL. Personally passionate about modding and creating useful, unconventional solutions.

EXPERIENCE

2SIMPLE

Sep 2025 - Present

Fullstack Developer

Remote

React • TailwindCSS • Python • PostgreSQL • TypeScript • MobX • Docker • Git

- Developing tools and pipelines for processing and transforming digital documents and scans
- Building dedicated applications and solutions for clients in the medical sector

BUSINESS SERVICE GALOP

May 2024 - Aug 2025

Front-End Developer

Hybrid

PHP • MySQL • Laravel • React Native • Vanilla JS • TypeScript • Next.js • TailwindCSS • Git

- Updated and expanded the internal event management system with new functionalities, system optimizations, and bug fixes; designed a new participant zone integrated into the event websites; created a dedicated system instance tailored to the needs of a major client, supporting diverse medical courses and events
- Developed a management system for the Endoscopy Section and a VoD platform for purchasing and accessing recorded conference content, dedicated front-end solutions for medical events (customized registration forms and websites, participant zones, API integrations) and responsive mailings compatible across all major email services
- Developed a mobile application for Zebra data collectors and a web application for attendance tracking during event sessions, supporting both self-scanning kiosks and Zebra scanners
- Built a customizable live voting application with an administrative panel and real-time results; developed virtual exhibitor booths with documentation for partner companies
- Provided onsite IT support during events across Poland, ensuring smooth operation of software systems and hardware reliability; assisted event participants when needed, including at international conferences; represented the IT department during international meetings and occasionally served as a company driver

ANFATA GAMES

Sep 2022 - Aug 2023

Junior Web3 Frontend Developer

Hybrid

Next.js • TypeScript • GSAP • Sanity CMS • Moralis • Firebase • Web3 • TailwindCSS • Git

- Developed a decentralized app integrated with Smart Contracts and ImmutableX collections, including marketplace, bridging NFTs between L1 and L2, enabling transfers between wallets, and implementing a live auction system.
- Worked with Moralis and Firebase databases and cloud functions, using TypeScript, Next.js, GSAP, and version control systems like GitLab and Bitbucket.
- Implemented a new homepage, integrated a Sanity CMS blog system, and built custom event-oriented websites and features across company platforms.
- Performed manual testing of Pirates of the Arrland, including the 3D MOBA game and 2D strategic map components within the decentralized app.
- Collaborated closely with cross-functional and international team to deliver integrated Web3 experiences.

SELECTED PROJECTS

POLONEZ AUTODRIVE

JavaScript • Three.js • 3D Studio Max

An 80s/synthwave-style 3D coloring-book like animation with real-time colors and models customization via a built-in GUI. Includes an arcade overtaking mini-game. The Polonez and palm tree models were made in 3D Studio Max, the rest of the scene is generated procedurally. Missing mini-game car model coming soon.

repository · web demo

VAT-OFF

JavaScript • Chrome Extension API • CSS

See prices excluding VAT when you hover over them on any website. Automatically detects prices and displays the net amount in a tooltip on hover. Supports 120+ countries with preconfigured currencies and VAT rates, and allows custom VAT rate and currency. Features a built-in VAT calculator (GROSS/NET). Available on the Chrome Web Store.

repository · Chrome Web Store

Yet Another Weather App

React • JavaScript • Sass • Vanta.js • Open-Meteo API

Weather apps are a dime a dozen, but this one is built differently. The background is a 3D scene with volumetric clouds that simulates the weather in real time from Open-Meteo data. The forecast is shown for a city selected via map, geolocation or entered city name.

repository · web demo

SKOFTWARE - my portfolio

Next.js • TypeScript • TailwindCSS • React Three Fiber/Three.js • GSAP • i18n

My portfolio website — a playground for web experiments. Features a 3D scene built in React Three Fiber, transitions and animations in GSAP, and i18n for multilingual support. Also includes a built-in web version of my resume in Polish and English. A project in constant evolution, probably never leaving "WIP" status.

★ Tibia Key Presser

Python • Tkinter • pywinauto

A lightweight Python automation tool for Tibia (MMORPG), supporting up to eight configurable key-delay pairs. Auto-detects the game window, runs silently in the background without interrupting other activities or games.
